

UMD MRSEC Takes Its Giant Buckyball on the Road

D. Hammer, A. Prasertchoung

University of Maryland MRSEC DMR 0520471

UMD MRSEC has developed an exciting nanoscience demonstration known as the Giant Buckyball. The Giant C₆₀, along with the smaller C₂₀, has been used in a variety of venues including museums such as the Smithsonian Spark!Lab in Washington, DC and Port Discovery Children's Museum in Baltimore, MD; summer camps; and science festivals to engage students and their families in the exploration of research science and engineering.
